

(E) A fish story

E1. Seven fishermen describe their catch; who caught what?

- g** 1. "Mä hach'a challwawa challwataxa."
- b** 2. "Kimsa hach'a challwawa challwataxa." (**lie**)
- a** 3. "Mä challwa mä hach'a challwampiwa challwataxa."
- c** 4. "Mä hach'a challwa kimsa challwallampiwa challwataxa."
- d** 5. "Paya challwallawa challwataxa."
- f** 6. "Mä challwalla paya challwampiwa challwataxa."
- e** 7. "Kimsa challwa paya challwallampiwa challwataxa."

E2. Describe this catch.

There are two possible correct answers:

*Kimsa challwalla paya hach'a challwampiwa challwataxa.
Paya hach'a challwa kimsa challwallampiwa challwataxa.*

E3: Describe your reasoning.

We need to notice the following patterns in order to solve this problem:

- *challwataxa* is the last word of each sentence, which may mean “caught” or “fished.”
- *mä*, *paya*, and *kimsa* are the numbers.
- *challwa* is the root “fish.”
- *-lla* indicates the little fish, whereas *hach'a* indicates the big fish.
- *-mpi* occurs whenever there are two kinds of fish.
- *-wa* occurs at the very end, but before *challwataxa*.
