

Round 2 2013

2. Putting the books in order [10 marks]

Soon after Maya Delgado was hired by accounting giant Jensen&Nakamura, she was sent on a consulting assignment abroad. Once at her destination, she was given two boxes (yellow and green) of statements from Jensen&Nakamura's branch offices in two countries in the region. Each box contained thirteen folders. Maya immediately figured out what the labels on the folders meant. Not only that, but she soon realized that one folder in each box was a fake.
