Sixth Asia Pacific Linguistics Olympiad

7 – 21 April 2024

Problems

- Listen carefully to the invigilators and follow their instructions.
- The contest lasts five hours. The problem set consists of six pages and contains five problems. You may solve the problems in any order.
- You are not allowed to use any electronic devices, written or printed material, or other external sources of information during the contest.
- If you have a question about any of the problems, put up your hand and ask an invigilator. The invigilator will consult with the jury before answering.
- Rules for writing out solutions:
 - Do not copy the statements of the problems.
 - Write down your solution to each problem on a separate sheet or sheets.
 - Use only the front side of the answer sheet.
 - On each sheet, write your name, the number of the problem, and the page sequence of that sheet within the problem, e.g.:

Name	...
Problem #	5
Page #	1 / 3

Name	...
Problem #	5
Page #	2 / 3

Name	...
Problem #	5
Page #	3 / 3

meaning first, second, and third sheet out of three for the fifth problem.

Otherwise, your work may be mislaid or misattributed.

- Unless stated differently, you should describe any patterns or rules you identified in the data. Otherwise, your solution will not be awarded full marks.

The contest problems must be kept confidential until they are published on the official APLO website <https://aplo.asia>. Do not disclose nor discuss the problems online until that date.

Problem 5 (20 points). Here are some equalities written in the Chungli dialect of the Ao language:

- (1) **tenemri ka + metsyri asym = tenem ser metsyri pezy**
- (2) **liri pezy + semyr maben pungu = tenem ser metsy maben tyko**
- (3) **tenet + ti = metsy maben pungu**
- (4) **metsy maben trok × pungu = lir anasy**
- (5) **teri ana × ana + rokyri asym = telang tyko maben tenet**
- (6) **semyr maben ti + liri ana = tenem ser metsy**
- (7) **tyko × trok = tenemri pezy**
- (8) **lir anasyri pezy – lir maben pungu = tenem maben tyko**
- (9) **teri asym × trok = lir anasy maben ti**

(a) Write the equalities (1–9) in digits, given that **metsy maben ti** is 18.

(b) Write in Chungli Ao: 10, 31, 36, 58, 93.

If an exact expression cannot be determined from the given data, write out all possibilities.

Δ Chungli is one of five dialects of the Ao language, which belongs to the Sino-Tibetan family. It is spoken by approx. 130,000 people in Nagaland, India.

ꝝ is a vowel.
